MOORE'S HOOSIER CYCLOPEDIA OUGHT TO BE IN EVERY SCHOOL

Moore's "Hoosier Cyclopeda" not only contains much valuable information for "the busy farmer, merchant, lawyer, educator and other citizen," but is a particularly valuable work for the teacher, and ought to be placed in every School in the State. Our schools should do more to acquaint the children with our local geography, history, institutions and men. This volume is a very complete compilation of statistical, official, historical, political and general information, and will form a good basis for a study of our State's interest.

Yours very truly, F. A. COTTON, State Supt. of Public Instruction.
